

## **PURUSLINE AND PURUSLINE CORNER Wetroom and Shower Area Linear Drainage Solutions SUMMARIES -**

### **Purusline Linear Drainage For Ceramic Floor Tiles into a Concrete Subfloor - Five Part System = One Unit**

- First of all choose your length 300mm, 600mm, 700mm, 800mm, 900mm, 1000mm and/or Corner.
- Then you will need Five Parts to make up the unit.
- The first is a Grate for Ceramic Tiles.
- The Second is a Body for Ceramic Tiles,
- The Third is a 50mm Outlet or 75mm outlet (***the standard outlet is a 50mm side outlet***) – Outlets available are Side, Side Side, Vertical/Bottom and Low Level (please note Low Level reduces flow rate to 30 Litres per Minute) see Purusline Brochure. Please note the outlet is made from Polypropylene PP Plastic and cannot be solvent welded, this is why the 50mm Side Outlet comes with a solvent weldable adapter to 1½ inch Waste Pipe. There is no adapter for the 75mm outlet and therefore it becomes a four part unit.
- The fourth is a Concrete Installation Kit for your chosen length/Corner.
- The 50mm outlet will come with a 50mm Adapter to 1½ inch Waste; this adapter is the fifth part. The adapter is a push fit system to the Outlet (it can be fixed with a MS Polymer to the outlet if you wish). The adapter is made from ABS Plastic and can be solvent welded to the 1½ inch Waste Pipe.

### **Purusline Linear Drainage For Ceramic Floor Tiles into Joists - Five Part System = One Unit**

- First of all choose your length 300mm, 600mm, 700mm, 800mm, 900mm, 1000mm and/or Corner.
- Then you will need Five Parts to make up the unit.
- The first is a Grate for Ceramic Tiles.
- The Second is a Body for Ceramic Tiles,
- The Third is a 50mm Outlet or 75mm outlet (***the standard outlet is a 50mm side outlet***) – Outlets available are Side, Side Side, Vertical/Bottom and Low Level (please note Low Level reduces flow rate to 30 Litres per Minute) see Purusline Brochure. Please note the outlet is made from Polypropylene PP Plastic and cannot be solvent welded, this is why the 50mm side outlet comes with a solvent weldable adapter to 1½ inch Waste Pipe. There is no adapter for the 75mm outlet and therefore it becomes a four part unit.
- The fourth is a Joist Installation Kit for your chosen length/corner. You have a choice of two. Either against a Wall (which is called the Wall joist installation kit) or anywhere else in room 200mm from the wall perimeter (which is called the Door joist installation kit).
- The 50mm outlet will come with a 50mm Adapter to 1½ inch Waste; this adapter is the fifth part. The adapter is a push fit system to the Outlet (it can be fixed with a MS Polymer to the outlet if you wish). The adapter is made from ABS Plastic and can be solvent welded to the 1½ inch Waste Pipe.

### **Purusline Linear Drainage For Vinyl Floors into a Concrete Subfloor - Five Part System = One Unit**

- First of all choose your length 300mm, 600mm, 700mm, 800mm, 900mm, 1000mm and/or Corner.
- Then you will need Five Parts to make up the unit.
- The first is a Grate for Vinyl Flooring; please note that this should always have the capital letter V after the Code Number.
- The Second is a Body for Vinyl Flooring; please note that this should always have the capital letter V after the Code Number.
- The Third is a 50mm Outlet or 75mm outlet (***the standard outlet is a 50mm side outlet***) – Outlets available are Side, Side Side, Vertical/Bottom and Low Level (please note Low Level reduces flow rate to 30 Litres per Minute) see Purusline Brochure. Please note the outlet is made from Polypropylene PP Plastic and cannot be solvent welded, this is why the 50mm Side Outlet comes with a solvent weldable adapter to 1½ inch Waste Pipe. There is no adapter for the 75mm outlet and therefore it becomes a four part unit.
- The fourth is a Concrete Installation Kit for your chosen length/Corner.
- The 50mm outlet will come with a 50mm Adapter to 1½ inch Waste; this adapter is the fifth part. The adapter is a push fit system to the Outlet (it can be fixed with a MS Polymer to the outlet if you wish). The adapter is made from ABS Plastic and can be solvent welded to the 1½ inch Waste Pipe.

### **Purusline Linear Drainage For Vinyl Floors into Joists - Five Part System = One Unit**

- First of all choose your length 300mm, 600mm, 700mm, 800mm, 900mm, 1000mm and/or Corner.
- Then you will need Five Parts to make up the unit.
- The first is a Grate for Vinyl Flooring; please note that this should always have the capital letter V after the Code Number.
- The Second is a Body for Vinyl Flooring; please note that this should always have the capital letter V after the Code Number.
- The Third is a 50mm Outlet or 75mm outlet (***the standard outlet is 50mm side outlet***) – Outlets available are Side, Side Side, Vertical/Bottom and Low Level (please note Low Level reduces flow rate to 30 Litres per Minute) see Purusline Brochure. Please note the outlet is made from Polypropylene PP Plastic and cannot be solvent welded, this is why the 50mm Outlet comes with a solvent weldable adapter to 1½ inch Waste Pipe. There is no adapter for the 75mm outlet and therefore it becomes a four part unit.
- The fourth is a Joist Installation Kit. You have a choice of two. Either against a Wall which is called the **Wall** joist installation kit or anywhere else in room 200mm from the wall perimeter which is called the **Door** joist installation kit.
- The 50mm outlet will come with a 50mm Adapter to 1½ inch Waste; this adapter is the fifth part. The adapter is a push fit system to the Outlet (it can be fixed with a MS Polymer to the outlet if you wish). The adapter is made from ABS Plastic and can be solvent welded to the 1½ inch Waste Pipe.
