06 February 2012

### **Purus drains selected by Bupa Ashford**

Purus, the wet room drainage solutions provider, has installed its wetroom drains at the new Bupa care home in Ashford, Warren Lodge.

Bupa Care Services, the leading international healthcare group, selected the PURUS miniMAX 50 and PURUS Mini Brage 50 to be installed at its new care home in Ashford.

PURUS miniMAX 50 is the world's shallowest (70mm plus 6mm fall) wetroom drain incorporating a NOOD no-odour trap without a water seal. It has an horizontal outlet, whilst the PURUS Mini Brage 50 has a vertical one.

PURUS miniMAX 50 and PURUS Mini Brage are both ideal for vinyl and ceramic tiled floors and come with a special designed water trap with NOOD-function. Purus' patented NOOD trap, which is spring loaded, ensures that no bad air comes through it even when dry.

Rob Needham and Sandy Scott of Bupa Care Services specified the drain. Sandy Scott says: "The Purus drains proved ideal for our requirements. They are shallow, which makes them ideal for cramped or restricted areas where space can be a problem, and they require very low maintenance. What's more their NOOD no-odour trap is a great feature, preventing bad smells from coming through."

Peter Bradbourne, managing director, Purus UK, says:

"At Purus we have created extremely practical and easy to install drains which are suitable for a variety of floor types. The PURUS miniMAX 50 and PURUS Mini Brage are a great fit for care homes, providing functionality and safety at the same time."
